The project uses LibGDX which is an open-source game development framework under the Apache License 2.0. This license is suitable as it is a permissive licence that allows use and modification of software under the licence with few restrictions. Due to its popularity there is the added benefit of clear legal terms and a range of information regarding it, making it perfect for commercial use.

There are several png assets which were drawn by the previous team using Pix2d art software, we have been given permission to use these assets.

The sound assets were sourced from the music platform Uppbeat. The click sound effect does not require credit, however it is still linked below.

Diagrams were made and updated in Lucidchart as it is free and simple to use.
